network service area will cover the 23 wards of Tokyo, Nagoya City, Osaka City and parts of Hyogo prefecture. They will offer nationwide LTE services to customers from the time of launch through services based on the roaming City and excluding high-traffic areas. The company currently has 3,490 base stations and plans to expand coverage to all of Japan by the end of 2021. Commercial service started in April 2020. Rakuten offers a single plan with a marketplace rescuers SoftBank, KDDI and NTT docomo. The unlimited data service will be available in TNO areas where the company has its own mobile infrastructure installed. Outside rakuten's own network, KDDI will carry tr	unlimited monthly data for ¥2,980. The price is less than half the comparable rates of
Mbps. That sounds good on the surface, but one of the conditions for signing up as a foreigner is that you have a Japanese residency card valid for a year or more, and it's only compatible with a small range of phones so it can't 带電話不正利用防止法) requires anyone who intends to purchase a voice call-capable SIM card (prepaid or afterpaid) to show proper identification document indicating that he/she has a residential (permanent) address in Japan.	be listed below. Edit source since 2006, the Mobile Phone Improper Use Prevention Act (携 A hotel address is not sufficient for this purpose. All foreigners must have an alien
registration to buy a vote that SIM has activated. As a tourist without a visa that allows it to stay for more than 90 days, you won't get one. So most SOEs are capable of voice calls aren't available to you. This law is strictly enforced residence paper. Telecom Square, Mobal, and SoftBank are now the only exceptions; SoftBank and Telecom Square SIM's must be purchased from an airport service desk in Tokyo (Narita/Haneda), Nagoya or Osaka (Kansai) works are not apply to data services and data-only SIM cards. If you want to make or receive voice calls in Japan, you will be limited to these choices: roam with national SIM card from another country (could be expensive) uses a specific process.	while Mobal SIM's can be pre-ordered online. More on this you find here. However, this law
(see all countries) uses the free Japan roaming included with the U.S. Sprint Global Roaming. It's free and fast for those who have a postpaid Sprint smartphone plan from the U.S. rent a device with local SIM card on arrival in J (cheap or possibly free) using VoIP with data-only SIM (cheap, see below) use SoftBank Simple Style, Mobal or Wi-Ho! (see below). While we focus on data in this Wiki here, check out this link for more voice call options from Ja	pan. Giteki mark The other legal limitation you should be aware of is the requirement of the
Giteki mark (see photo). Officially, all electronic devices used in Japan must be certified and marked with this token. It's illegal even using an iPhone without it. While this law is very dire abroad and is slowly becoming less releva points, be sure to remain responsible and strategic using your own non-Japanese electronics in Japan. More information: here. According to MIC, visitors with foreign devices who have FCC or CE certification can now use their source To edit Note that in Japan there are now many offers, which can be purchased from places such as airport vending machines, Yodobashi Camera electronic stores, BIC Camera and others. The prices for these cards are	devices up to 90 days without violation on a local SIM card. More information is here. Edit
Religion[edit] NTT DoCoMo has the best network in the country and a market share of almost 50%. A 2G-only phone doesn't work because there simply is no 2G. Its 3G network is known as FOMA (standing for Freedom of Mob stations scattered across. The 800 MHz and 1700 MHz (not AWS as in the U.S., but EAWS) are only used in Japan, so probably aren't covered on your phone. A device that works on 800 MHz in 2G or 4G/LTE will not carry 800	MHz in 3G. You can expect to get NTT's 3G only in cities at 2100 MHz with a device
purchased outside of Japan. His 4G/LTE is called Xi on 700 MHz (B28), 800 MHz (B18), 1500 MHz (B11), 1800 MHz (B3) and 2100 MHz (B1). Some of these frequencies are also used in other countries, but the most widely use Communications (OCN)[edit edit] NTT Communications prepaid SIM for smartphones uses NTT Docomo's 4G/LTE and 3G networks and gives users up to 100 MB of high-speed data per day for either 7 or 14 days. SIM card concluded.) For 14 days After purchasing the card, activation process in which personal information is asked to enter is required to start using. Edit source in Edit] Until 2016 it was possible to SIM maps online from the official well	omes in standard, micro and nano-sizes and is for: ¥3,218 (tax included.) for 7 days ¥3,780
This option is no longer available. Instead, they published a long list of point of sale points at airports, ports, bus terminals, train stations, tourist information centers, convenience stores, electronic retail stores and travel agencies and Chubu Centrair airports as well as from a machine located in the Narita Excel Hotel Tokyo. Vending machines at Narita Airport Terminals 1 and 2 sold the cards priced with a surcharge at ¥3,726 for the 7-day plan and at ¥5,	345 for 14-day plan. SIM cards come with English instructions and an option to connect to
the Japan Connected-Free WiFi service. It is a free WiFi hotspot service by NTT-BP, designed for visitors to Japan, which is found at international airports, Shinkansen train stations, major tourist attractions and popular locations some money and have low usage needs, they have another prepaid product not specifically marketed to visitors, under the OCN Mobile ONE name: ¥3,080 (tax included.) for 50 MB/day for 20 days This SIM can be amounted to day top-up voucher can be bought at major electronics stores or at 7-Eleven. For travelers flying from Hong Kong to Japan, NTT has a special deal with Klook for SIM cards to be picked up ¥ 1,800 (US\$15 plus 8% tax) at Hong I	with an additional 50 days of validity with the same allowance for ¥2,420 each day. The 50-
GB of 4G data plus unlimited 3G Data rate[edit edit source] Data is up to 100 MB per day at a maximum. After the daily high-speed attribution is used, the maximum will. All three SIM sizes are available. Edit source Edit: Ite-d. More info Religion[edit] Website in English: b-mobile[edit edit source] The prepaid smartphone data SIM cards offered by MVNO B-mobile provide data on NTT Docomo's 3G/4G network. They also had vote, but it was suspen Camera or BIC Camera Chains (store list) or online from the b-mobile site or Amazon.co.jp. Cards purchased online can be delivered to hotels, post offices at major airports or any Japanese address within 2-4 days. They've had	ded.
